

BEN LINE PROJECT LOGISTICS
Your Partner in Asia

NORWAY CABLES

Client Profile:

Client is a well-established construction company that specializes in Subsea Electricity cabling and has a long standing relationship with the state power company in Vietnam.

Client Relationship:

The relationship was established in 2015 after presenting our company structure that could provide our client with many services in key areas of Vietnam and globally.

Project Profile:

Ben Line Project Logistics were awarded a shipment of 2,500 meters of subsea cable. Ben Line Project Logistics had to arrange fabrication of a tank to spool the cable into and to provide a vessel to transport the cargo within a short timeline.

Project Summary:

Challenges:

- Finding a fabricator in Norway through our local partners that could fabricate a tank to the clients specification and before the vessel arrived.
- Ben Line Project Logistics were appointed to provide the on board stevedoring to spool the cable onto the vessel in Norway and at discharge in Vietnam. This was completed within tight timeframes in order to keep the clients costs down on vessel waiting time.
