# TUG AND BARGE

## Client Profile:

Client is a French owned company established in Vietnam from 2005. Their products are mainly exporting to French Colonies like New Caledonia, and Seychelles

## Client Relationship:

Started in September 2013 – Ben Line Project Logistics has managed the full scope of logistics services from customs clearance, wet towage for tugs and barges to alongside Heavy Lift Vessel, insurance, cargo inspection, loading survey, delivering cradles to vessel by barge and chartering.

## Project Profile:

Ben Line Project Logistics was appointed to perform an Ocean freight shipment of 2 new tug boats and 6 barges. Ben Line Project Logistics arranged a barge for delivering cradles to vessel first.

Tugs for towing Customer's newly built tugs and barges to alongside Heavy Lift Vessel for lifting with lifting lugs.

Permits for floating units from Customer to moor alongside Heavy Lift Vessel.

## Project Summary:

### Challenges:

- Ben Line Project Logistics know the operation very well after handling many previous shipments from the same loading and discharge ports.
- We experienced heavy rains during the loading operations which proved to be challenging but with our HSE coordinators present, we were able to perform the loading in a safe manner without any incidents.
